

Data Visualisation and Analysis using Tableau

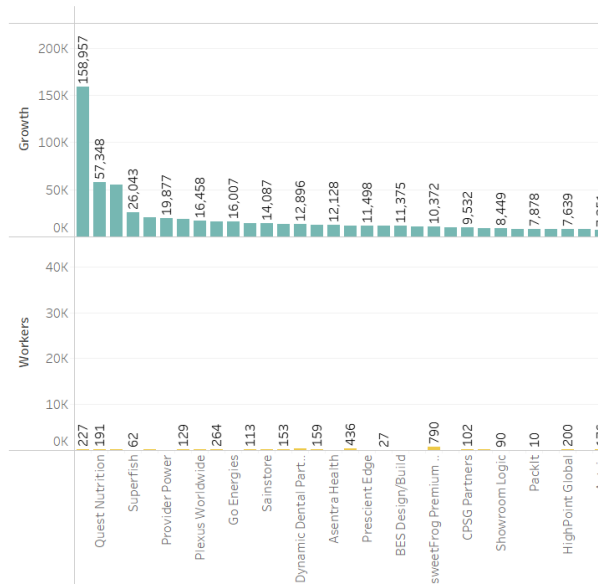

- The industry with the most growth is Consumer products & Services. IT services, Health, Advertising & Marketing and Business Products & Services are also ranked in the top 5 for most growth.

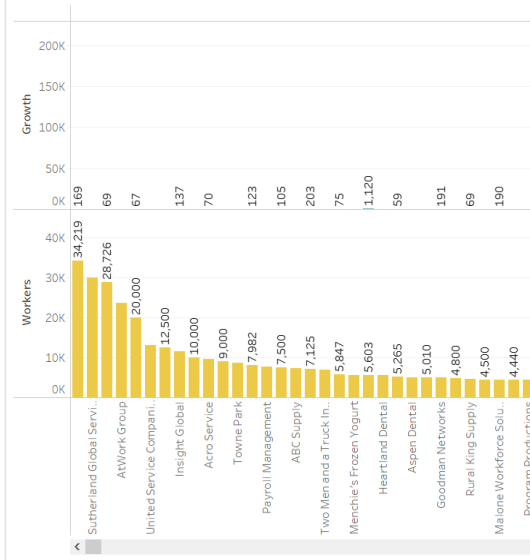

- The number of years a company has been on the list does not make it more likely to appear on the list again. Graph1 - Shows growth in ascending order. Some of the companies that have been on the list longest are having the lowest growth and likely to fall out of the list. Graph -2 shows growth in descending order and shows that the Company with the highest growth, 'Fuhu' has only been on the list for 2 years

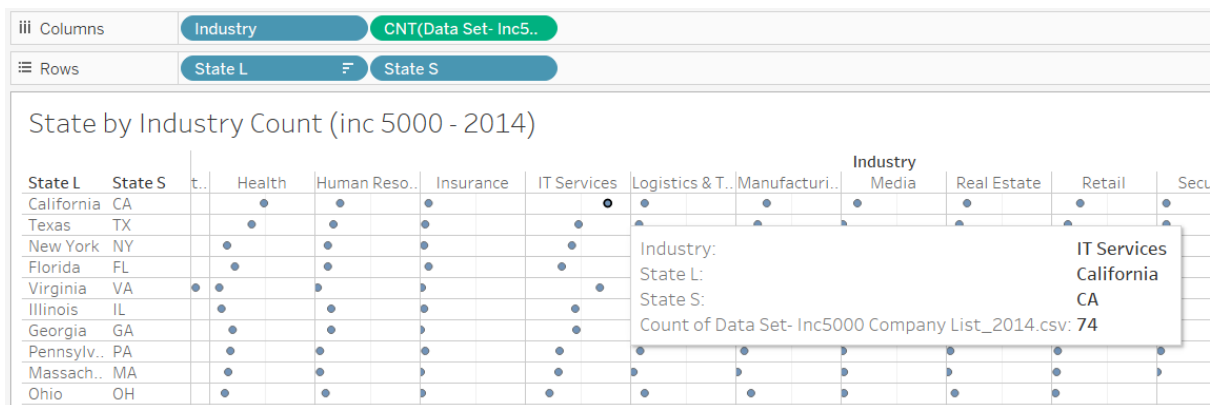

Growth & Number of Workers by Company (inc 5000 - 2014)

Growth & Number of Workers by Company (inc 5000 - 2014)

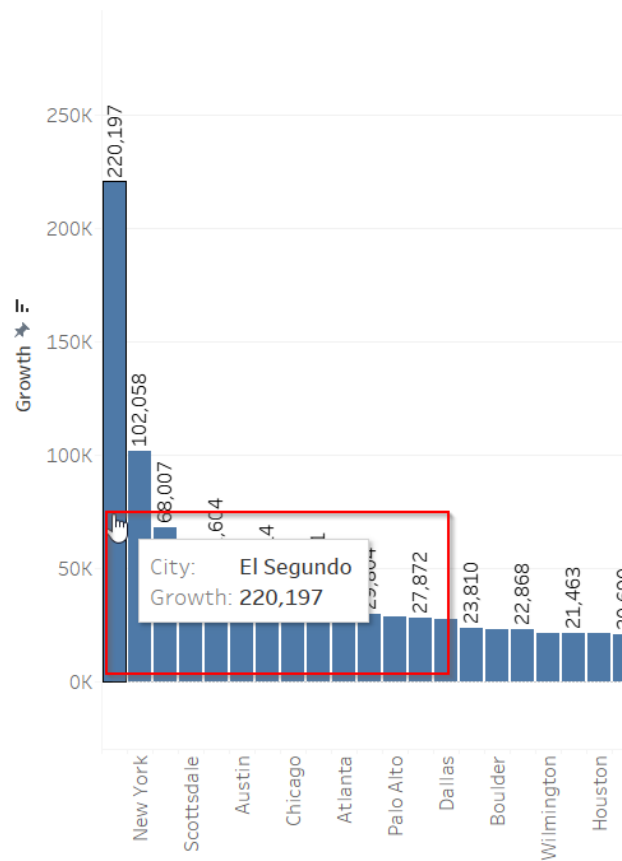

- There does not appear to be any correlation between number of workers and growth of a company. The company with the highest growth has only 227 workers. Similarly looking at the number of workers in descending order shows that the company with the highest number of workers has one of the smallest growths.

- Arranging the count of companies per industry in ascending order shows that California has the highest number of companies (74) in IT Services from the inc5000 list.

Growth by City (inc 5000 - 2014)

- El Segundo is the city with the highest growth. New York, Scottsdale, Austin and Chicago are also in the top 5 growth.
